Introduction

Following the success of the previous two versions of the International Pediatric Hematology Conference, that was held in January 2020 and August 2021 in the Kingdom of Bahrain, with thousands of attendees and with the ongoing demand and requests, we are delighted to announce the hosting of our upcoming virtual conference, the 3rd International Pediatric Hematology Conference (IPHC 2022), on October 20 – 22, 2022.

The main aim of the conference is to discuss the recent approaches, advancements and challenges faced with pediatric hematology. This virtual conference is designed with the intention of reviewing every aspect of the diagnosis and management of pediatric hematological diseases and exploring the latest global updates as well as the skills in relation to this specialty.

IPHC 2022 is planned to create a comprehensive intellectual and operational environment for acquisition of knowledge, skills, clinical judgments, and attitudes essential for the practice of clinical pediatric hematology.

This conference is an ideal chance to meet incredibly renowned speakers, and connect with expert pediatricians and hematologists. The scientific program provided a multi-disciplinary approach to the assessment, diagnosis and treatment strategies for pediatric blood diseases management presented by leading edge international, regional and local experts who will show the most recent data and give their valuable opinions on the clinical applications.

Objectives

The active participation in this multidisciplinary virtual conference should enhance attendees' knowledge of the most recent innovations, trends, and concerns, practical challenges encountered and the solutions adopted in the field of paediatric blood disorders.

Who Should Attend

The International Pediatric Hematology Conference attracts a large range of delegates including Pediatric Hematologists, Pediatricians, Neonatologists, Family Physicians, General Practitioners, Pathologists, Pharmacists, Nurses, Healthcare Planners, and other Healthcare Professionals seeking updated information on pediatric blood disorders

Speakers

The scientific program will be run by distinguished and renowned international, regional and local speakers with vast experience in the field of blood disorders diagnosis and management.
